Detailed Office Action

Election/Restriction

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

1. Embodiment wherein an optical measurement device is used for measuring the amount of dust on a surface.
2. Embodiment wherein a thermal measuring device is used for measuring the amount of dust on a surface.
3. Embodiment wherein an ultrasound device is used for measuring the amount of dust on a surface.
4. Embodiment wherein a pressure sensor is used for measuring the amount of dust on a surface.
5. Embodiment wherein a strain sensor is used for measuring the amount of dust on a surface.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify

the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

1. Claims 1-5, 12-13;
2. Claims 1, 6-8;
3. Claims 1,9;
4. Claims 1,10;
5. Claims 1,11.

The following claim(s) are generic: claim 1

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Claim 1, at least, is anticipated by or obvious over US 4,402,607. Consequently, the special technical feature which links claims 2,6,9,10,11 does

not provide a contribution over the prior art, therefore unity of invention is lacking.

A telephone call was made to Jeffrey Nolton on 03/07/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
